

VAISHNAVI NAGA SUNANDA PARASA

Data Analyst | Business Intelligence | Cloud & Analytics

+91-8688337723 • vaishnaviparasa2004@gmail.com • linkedin.com/in/vaishnavi-naga-sunanda-parasa-641117281 • github.com/VaishnaviNagaSunanda

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and MCA candidate proficient in Tableau, Power BI, Python, and SQL for deriving actionable insights from complex datasets. Experienced in end-to-end data pipelines, cloud computing (AWS), and machine learning, with a passion for data-driven decision-making.

TECHNICAL SKILLS

Data Analysis & Visualization: Tableau, Power BI, Excel (Advanced), Data Cleaning, Data Storytelling, Dashboard Design

Programming Languages: Python (Pandas, NumPy, Matplotlib, Scikit-learn), SQL, Java, C

Database Management: MySQL, MongoDB, SQLite, Database Design, Query Optimization

Cloud Platforms: AWS (EC2, S3, IAM), Cloud Infrastructure, Cost Optimization

Machine Learning & AI: Deep Learning, Transfer Learning, Image Classification, CNNs

Web & Tools: HTML, CSS, JavaScript, Node.js, Flask, Git, GitHub, VS Code, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Data Analytics Intern | SmartBridge (in collaboration with APSCHE) | June 2025 – August 2025

- Conducted end-to-end data analysis on real-time datasets using Tableau, applying data wrangling, EDA, and visualization techniques to surface actionable business insights.
- Designed interactive Tableau dashboards to monitor KPIs; applied data cleaning and transformation pipelines to improve data quality across multiple datasets.

AWS Cloud Computing Intern | Adhoc Network Tech | February 2024 – April 2025

- Deployed and configured core AWS services including EC2, S3, and IAM to architect secure, scalable cloud environments.
- Optimized cloud resource utilization and reduced operational costs through performance tuning and right-sizing strategies during real-time deployments.

PROJECTS

QR-Based Smart Car Parking System

Tools: Python, HTML, CSS, MongoDB, Flask

- Developed a full-stack smart parking management system using QR codes for automated vehicle entry/exit tracking with real-time slot availability, automated billing, and notifications.

Monument Identification and Visualization Using Deep Learning

Tools: Python, Flask, TensorFlow/Keras, SQLite, Augmented Reality

- Built an AI-powered application for real-time monument recognition using CNNs with transfer learning; integrated Augmented Reality (AR) for interactive 3D visualizations and geolocation data.

EDUCATION

Master of Computer Applications (MCA) | CGPA: 8.5 | 2024 – 2026 | Swarnandhra College of Engineering and Technology, Narsapuram

Bachelor of Science in Computer Science (B.Sc) | CGPA: 8.9 | 2021 – 2024 | Aditya Degree College, Palakollu

CERTIFICATIONS & ACHIEVEMENTS

Introduction to Machine Learning – NPTEL • AWS Solutions Architecture Job Simulation • Foundations of Programming with Python – ExcelR • Cisco Cyber Security Essentials

Solved 50+ coding problems on LeetCode, CodeChef, and GeeksforGeeks, demonstrating proficiency in algorithms, data structures, and problem-solving.
